

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protection. Indiana's Telephone Privacy law has improved your time at home. Indiana's law has been very effective for us. We used to receive approximately 8 calls per week, now we very seldom receive a call. We beleive the right to enjoy our time in our own home is or right and should not be intruded upon by unwanted phone calls. Before this law was established in Indiana, we would receive calls even on Sundays and as late as 9:30PM. This was definately an intrusion to us. To weaken the Indiana law would be a disappointment to us.

Thank you for your attention to this message. Working together, we can ensure the success of our Telephone Privacy program for many years to come.
